

Jay County Robotics

Who are we?

Jay County Robotics (JCR) is a competitive robotics group that has multiple teams that compete in the international Vex Robotics Competition. We compete against teams from around the state and from all over the world.

What do we do?

We use 21st century job skills to design, build, test and compete with robots that our students create. The students are given a game and a set of rules to follow; our students then create a robot from scratch that will fit within the rules and guidelines of the competition. The program is based on STEAM (Science, Technology, Engineering, Art and Math) and allows for students to see real life applications of those subjects.

Where do we do this?

We compete statewide during the fall and winter. When we win an event we are qualified for the State Championship that takes place in early March at Lucas Oil Stadium. If we do well at State, we qualify for the World Championships in Louisville.

JCR is proud to say we accept any student who wants to participate in robotics. We never turn a student away due to grades or financial situations. We believe that some students learn in unconventional ways. Robotics allows students to be hands on and to be creative. The robotics program is not a cheap program to run. We are looking for contributions to help fund our travel and robot costs.

Our students are learning practical, employable skills for the 21st century workforce. We proudly work with our sponsors on getting them quality employees in the future. Many of our students have gone on to work for sponsors, by either completing internships for them or working for them full time after high school. We work closely with sponsors to make sure students graduate with skills that are applicable in the workforce. Our sponsorships aren't just a one way experience; we love to train your future employees with skills that will benefit you. No other program at JCHS works as closely with you on making sure the future of industry in Jay County has qualified employees.

On the next page, you will find our donation information and levels of sponsorship.
